

## **Module 6: Preparing for an AI-Driven Workforce – Key Takeaways**

### **Essential Skills for an AI-Augmented Workforce**

**1. AI Understanding & Data Fluency**

The ability to work with AI tools, interpret data, and make informed decisions based on AI-driven insights.

**2. Critical Thinking & Judgment**

Ensuring AI-generated content is accurate, unbiased, and aligned with real-world contexts rather than relying on it blindly.

**3. Creativity & Innovation**

Using AI as a tool for ideation and enhancement while maintaining originality, problem-solving skills, and human ingenuity.

**4. Adaptability & Continuous Learning**

Staying ahead of AI advancements by continuously learning, experimenting with new tools, and adapting to changing workflows.

**5. Emotional Intelligence & Human-Centred Skills**

The ability to collaborate effectively, show empathy, and apply emotional awareness when working with or alongside AI systems.
