

# Essential Skills for an AI-Augmented Workforce

## AI Understanding & Data Fluency

The ability to work with AI tools, interpret data, and make informed decisions based on AI-driven insights.

## Critical Thinking & Judgment

Ensuring AI-generated content is accurate, unbiased, and aligned with real-world contexts rather than relying on it blindly.

## Creativity & Innovation

Using AI as a tool for ideation and enhancement while maintaining originality, problem-solving skills, and human ingenuity.

## Emotional Intelligence & Human-Centred Skills

The ability to work with AI tools, interpret data, and make informed decisions based on AI-driven insights.

## Adaptability & Continuous Learning

Staying ahead of AI advancements by continuously learning, experimenting with new tools, and adapting to changing workflows.
